

Assured Agile Digital Transformation

The evolution of digital technology presents huge opportunities and constant threats for all businesses. Never before has the importance of quality and security been so high. Assuring the delivery of digital programmes is of paramount importance. These programmes not only need to deliver the desired business outcomes, but need to form the foundations of an organisation that can affectively cope with constant change, deliver consistent high customer experience and drive innovation for years to come.

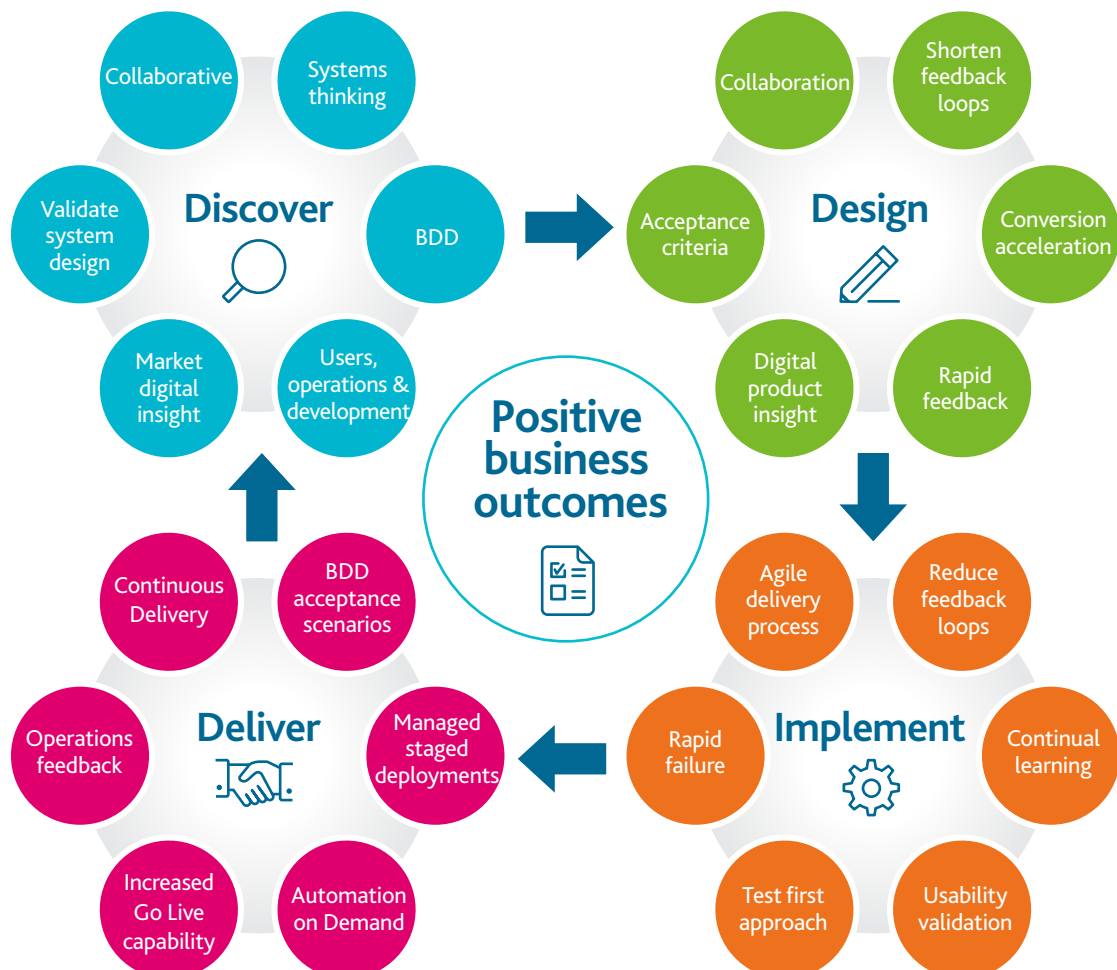

At Capita, we take on the challenges caused by digital disruption: we aid our clients through the process of digital transformation and deliver on our commitments, bringing you success.

Our Digital Assurance portfolio enshrines the principles of agility, proactively discovering business opportunities in the digital world. We offer a full range of services that can be used individually, or as a collection of services, or we can take full ownership of projects.

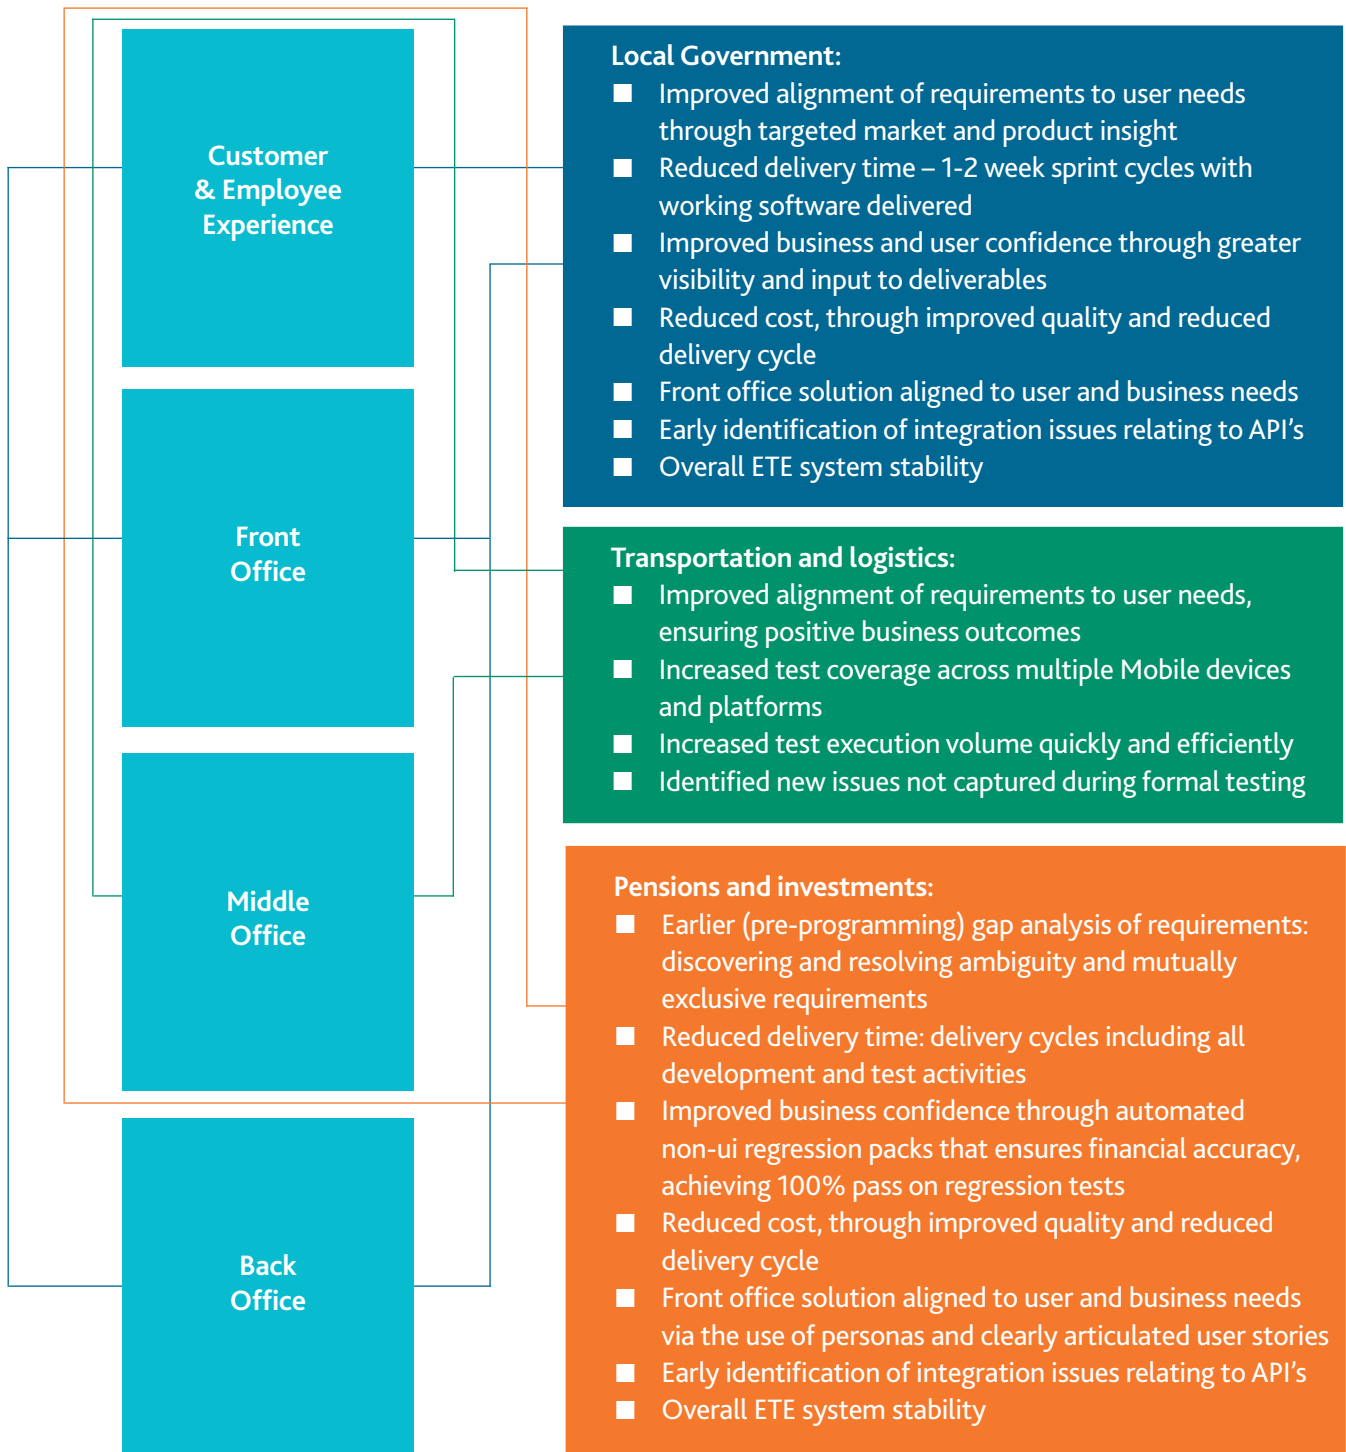

Our approach is centred around ensuring successful client outcomes. By following our tried and tested methodology, we can reduce risk and cost to the programme, ensure high customer / user experience along with delivering early release to market.

Key to our approach is continual learning, which sits at the centre of our approach and is integrated within all phases. This enables increased sprint velocity over time, future proofing when designing the solutions and assuring on time delivery, with zero known defects. We also gain real user feedback and digital market insight through the use of our extensive crowd source user base. This allows us to gain rapid feedback effectively delivering high volumes of man days testing in high compressed timescales.

Capita's approach to 'Assured Agile Digital Transformation'

Our experience spans both the entire digital landscape and breadth of complex public and private organisations. Below are some examples of the benefits our clients have achieved working in partnership with us, to deliver assured agile digital transformation.
