

Performance

testing

Why your organisation needs this service

- Increased dependence on electronic interaction with customers
- Increase sales by outperforming competitors and ensuring the best possible customer experience
- Essential if regulatory requirements mean that performance must meet published standards
- Reduce costs by increasing reliability

Services overview

The service delivers performance testing across systems and applications to ensure that they meet business requirements, expectations and work efficiently and effectively.

Our performance testing service assesses both the "current state" of systems (ie current workload levels) and can also be used to predict systems operation under future workloads, as well as potential future issues.

Our performance testing services can also contribute to your capacity planning analysis at the start of a project.

The service has components which can either be purchased as modules or can provide an end-to-end service for all your performance needs:

- Initial analysis
- Performance test planning
- Scripting
- Provision of cloud infrastructure
- Test infrastructure
- Execution
- Monitoring
- Analysis
- Reporting

This service gives you an understanding of the maximum capacity of the system, helping to identify required changes now and in the future.

Benefits

- A comprehensive test of technological changes in the best manner possible using the industry standard tool set
- Performance testing reduces the risk of losing customers or revenue owing to badly performing software or applications
- It reduces the likelihood of costly reworks
- It ensures the best configuration of software reducing the need to spend budget on more costly hardware
- Loss of sales owing to poor performance can be prevented
- Performance testing can help you meet your regulatory requirements
- Your organisation can compare between releases to give a long term idea of the way performance is going allowing for planning of architecture, infrastructure and capacity

Why Capita?

- Owing to our position in the market, we can formulate attractive deals with tools vendors, which we pass on to our clients
- Our highly skilled consultants have a proven track record delivering performance testing
- The depth and size of Capita's businesses allows us to easily source performance specialists
- Our test resources are certified (ISEB/ISTQB) at all levels
- Our resources have the depth and flexibility to meet a project's peaks and troughs
- We have vast experience of working with different technologies, markets and regulatory requirements
- We offer a choice of on-shore, near-shore and offshore facilities
